Tambahkan Cara Memproseskan Pilihan Ganda Menyangkal Akhir Semester Kelas SMP 3 ketika ada pilihan ganda.The invention is an improvement in the processing of low-phosphorus crude oils which, by virtue of the presence of the organosulfur compounds contained therein, have notoriously difficult processing problems. These organosulfur compounds have been implicated as being responsible for corrosion of metal surfaces in the processing of low-phosphorus crude oils, causing concomitant acid gas formation, objectionable odor problems, and refining difficulties. Various methods of neutralizing the organosulfur compounds in the low-phosphorus crude oils have been suggested. However, such suggested methods either react with other components of the crude oil in such a manner as to result in unwanted physical changes in the products or contain such reactants or other necessary materials as to render such methods prohibitively expensive. For example, a high-tem
