You've got the first 24 minutes of bonus footage. And if you're a fan of DJ Hero, you'll be ready to crack that code by the end of this preview. DJ Hero - Battle Mode will have two modes: Battle mode and Practice mode. Practice mode is what you're used to. Your stylus

plays music as you spin the turntables. When you're ready, you move to Battle mode, where you use the turntables to mix and scratch records. You can also use the Garage band of that much-talked about DJ Hero controller to create remixes. During the single-player campaign, you can battle your friends in Arcade mode. There are three Arcade modes: Local, Online, and Open-Mix. The Local mode lets you battle against a friend, either locally or online. The Online mode lets you

battle against another player at your online friends' house, either alone or with a friend. Finally, the Open-Mix mode lets you battle in real-time against a computer, which will create new remixes based on your existing mixes. DJ Hero - Battle Mode is scheduled to be released for Xbox 360 on February 23, 2010. Bioshock 2 - Enhanced Edition Biosh

Tau is a portable audio editing and mastering application designed for music and film producers. Tau was designed to be a professional audio tool and it's not. Tau's focus is not on visual effects or visual tools. It's focus is on creative ease-of-use, speed and quality. Tau offers up to 5 workstations, creating a range of audio production tools. From its "start window" it works like a fully-featured audio editor. Once

you've opened your project, you can add effects and change effects parameters from there. You can save the audio as WAV, MP3 or Ogg Vorbis and choose between lossy or lossless compression. Tau Effects Description: Tau Effects is a new plugin for Tau that turns Tau into a fully featured audio effects rack. Tau Effects will add effects from the list below to Tau's start window. Each of the effects listed below has an option for ramping or a send/return option. If a return option is

chosen, the output can either be sent back to the input or sent to another effect (like an echo or reverb). You can also send the output to a selected output as a "dry" or "wet" effect.

AirDust
Description: AirDust is an innovative first-of-its-kind multipurpose noise reduction system designed to be used in studio, live and post-production environments. AirDust was designed to reduce noise in the most demanding audio situations; including noisy recording studios,

acoustically problematic lecture halls, and sound stages with excessive echo and reverb.

AirDust is a hardware based, real-time, multi-band, noise reduction system that can be applied to any audio signal. It's results are surprising because it makes audible noise that was undetectable by the human ear.

Animator Description: Animator is a general purpose video or audio effect plug-in. Designed to work seamlessly with popular 3D and 2D animation tools like

Animoog, Motion and
PowerAnimator. BWF

Description: BWF is an audio effect plug-in and VST instrument developed for the creation of enhanced binaural reproduction of music. BWF is a creative and easy-to-use audio plugin that turns stereo recordings into a binaural mix, that's clear, natural and much more engaging.
