I'm trying to find a way to load it from other class in my application. I've never used build files so I have few questions : How to load it into code? I guess there should be a way to access source code of the build.gradle file from Gradle plugin? How to override some properties? What is the best way to use properties from build.gradle? A: This is usually implemented using the GradleBuild object of Gradle. For example, it's possible to use a GradleBuild object to load a build file from an external server. Similarly, you can execute external scripts with the Gradle.exec() or

Gradle.withDependencies() methods of Gradle. I have never had an aural experience as profound as Michael and his music. I have been listening since about birth. My mom has always had Michael on. I went to a few concerts that Michael played at. Until my aural problem started, I was unable to listen to him and his music without hearing his voice and feeling the tension and release of his words. When my hearing stopped, I was able to only listen. Before 'The Leftists' I never really appreciated Michael Jackson until I was awoken by 'The Dangerous-'... The emotions and the knowledge that were left with me were so powerful that I knew what it meant to dream of him. As a child growing up in the '80's I knew I needed to know his songs. When I turned on the radio I always ended up being tuned into that particular station and the Top Ten was brought on and Michael Jackson's songs... like no other artist before or after had done... I was amazed! The melodies and the words would just hit me over the head and take hold of my soul. Every song was a love poem, a revelation, a message to me... as a child I was able to understand more of his lyrics than most adults I know. I didn't want to understand what was being said but the feeling behind what he was saying was impossible to ignore. I felt so connected to his music that I felt his deep sadness, his pain,
