Necromunda®: Underhive Wars is the new, standalone co-op tactical miniatures game. It is set in the cold, industrial heart of the 41st Millennium and pits gangs against each other for control of vast territory held together by towering corporate megacorporations. Gangs are made of several different factions, each with their own personality, traits and

play styles. They're supported by a wide variety of powerful support troops and siege weapons, all of them carefully matched against your opponents. The game features full Rulebook, Character Sheets and the Full Color Rulebook, this rulebook is extra and you will need to pay a little extra for this book, but you will have an easy to use toolset when building your gang. The Necromunda®: Underhive Wars physical game is a fully scale tabletop experience. Its specialized transport case contains over 500 unique pieces and rules, a gang and tools for three to six players, and a battle mat for four to six games at once. Features Gangs: Each gang is controlled by a gang master and his or her lieutenants, crew and supporters. Stronger and tougher specialised troops are the key to winning. From tough and reliable Heavy Weapons Teams to devastatingly effective swarms, gangs compete on many different levels. Siege Weapons: Ganging up on the enemy can be a simple matter of attacking their fortifications, or it can be a deadly necessity. Giants or siege weapons of all shapes and sizes can be deployed to crush the opposition and then establish a siege line. Epic BATTLE MAT: Designed for play by up to six players, it can host four games at once, and with its distinctive design features, it won't look out of place anywhere from a grim Necromunda® battlefield to an elite sci-fi colony. Skirmish Mode: This mode allows you to play a particular scenario for up to four players as either an AI or human-controlled gang. It features a standard selection of different Game Modes, including "Campaign", "Operations" and "Skirmish", each offering a different play experience. "Evil G" Genre for Short: This is a standalone game for players who love the thrill of Necromunda® but not the commitment of a game-long campaign. It is almost infinitely replayable and is perfect for players who simply enjoy skirmishing and want to achieve a quick result. The experience
